---

## SUMMARY

Frontend web developer with strong proficiency in **HTML**, **CSS**, **JavaScript**, and **React.js**, capable of building responsive and dynamic user interfaces. Currently expanding backend development skills with **Node.js**, **Express.js**, and **MongoDB** to become a full-stack developer. Passionate about creating efficient, user-friendly web applications and continuously learning new technologies to enhance development capabilities.

## EDUCATION

University College Of Engineering

Kariavattom, Trivandrum

Graduated: 2025

Bachelor of Computer Science and Engineering

## SKILLS

- Web Development: **HTML**, **CSS**, **Responsive Design**
- Programming Languages: **JavaScript**
- Front-End: **React.js**
- Back-End: **Node.js**
- Database: **MySQL** and **MongoDB**

## PROJECTS

### Crowd-Sourced Gadget Review System

A full-stack web application that allows users to post and review gadgets with star ratings, comments, and images.

Key Features:

- User authentication using JWT and secure password hashing.
- Dynamic review form supporting star ratings, comments, and image uploads.
- Responsive UI developed with React and CSS Modules.
- Routing and navigation managed via React Router.
- MongoDB used to store user profiles, reviews, and image metadata.

#### Highlights:

- Enables users to register, log in, and securely submit gadget reviews.
- Implemented robust JWT-based authentication and encrypted password storage.
- Designed a user-friendly and responsive interface for both desktop and mobile users.

### **React Portfolio Website**

Developed a fully responsive and visually engaging portfolio website using React.js.

#### Key Features:

- Built with reusable components, functional hooks, and React Router for seamless navigation.
- Integrated interactive UI elements such as modals, image galleries, and validated contact forms.
- Used CSS Modules and styled-components for clean, modular, and maintainable styling.
